

CrosScan

0280S

CrosScan is a word-search puzzle with crossword-style clues instead of a word list. The answers to the clues are found in the letter block. The number beside each clue indicates the number of letters in the answer.

SOLVING TIP: Don't start with Clue #1, etc. Instead, first discover all the words that you can in the letter block, and then find the clues which will match them.

The puzzle has a hidden theme, which will emerge as you work. The clues contain many double meanings, but the answers all relate in some way to the topic. The leftover letters will form a quotation about this topic.
